-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aulick et al. P.N. 5,085,171 (Aulick) in view of Kinoshita et al. P.N. 6,360,068 (Kinoshita). Aulick discloses a compliant doctor blade for regulating the amount of toner on a toner carrier. As prior art, Aulick discloses (see col. 1 lines 55-68 and col. 2 lines 1-21) a rigid blade having a tungsten carbide coating.

The difference between the claims at issue and the prior art as described by Aulick is that the claims call for a "flexible metallic substrate" in contradistinction to the rigid blade described by Aulick.

Art Unit: 2859

This difference however, would have been obvious to the artisan of ordinary skill in the art at the time the invention was made in view of the teachings of Aulick and Kinoshita. Both Aulick and Kinoshita (see for example Col. 1 lines 45-53 in Aulick and col. 3 lines 5-10 in Kinoshita) teach of the disadvantages of rigid blades. Because of these teachings, the artisan of ordinary skill in the art, would have found advantageous to make the tungsten carbide coated blade of the prior art, a flexible blade as opposed to a rigid one. The use of a flexible blade, made of a flexible metallic substrate as for example, that described in Kinoshita's claims, or col. 22 lines 55-68, would result in the instant invention as claimed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. With et al. discloses a detoning blade. Note the structure of the blade as described in the abstract of the disclosure.
